## **VICE-CHANCELLOR'S NOTE**

This prospectus describes the range of courses we provide at our University. The foundational purpose of UAUT was to raise Tanzanian leaders who are equipped with excellence in wisdom, knowledge and Christian virtues, therefore we stand as a unique community of students, academicians and staff dedicated to; excellency of teaching, moral integrity, diligence and outstanding professionalism. We partner with this government's vision of transforming Tanzania into a semi-industrialized country, whose citizens will embrace a middle-income bracket economy.

In achieving this aim, we have conceived the Kibada Techno-Valley in order to contribute positively to the national income growth.

Prospective students must understand strongly the pressure for change and therefore become visionaries with the purpose of making UAUT a first class research university. At the same time, we will strive to attain the country's objectives of VISION 2025 and beyond, with the strategies and efforts to industrialize Tanzania through a knowledge-based economy.

It is our sincere hope to produce the necessary critical mass of a skilled and educated society, without which our country cannot ensure a genuine and sustainable development.

The efforts of UAUT will work in unison with the decision of the Fifth Phase Government towards transforming Tanzania into an industrialized country.

Humankind is living through its greatest technological decade ever. Because of this, we eat books and drink knowledge.

Come One, Come All

## **7 CAMPUS COLLEGES**

### **7.1 College of Engineering and Technology (CoET)**

#### **7.1.1 Introduction**

The College of Engineering and Technology (CoET) was founded in 2012. It comprises one department namely; Computer Engineering and Information Technology (CoEIT), and offers the Bachelor Degree in Computer Engineering and Information Technology programme.

##### **7.1.1.1 Justification of the Programmes offered at CoET**

The modern era has witnessed a rapid development in computer technology, both in hardware and software. Each year a host of new advancements is unveiled, from home robotics to advanced operating systems, microprocessors, and supercomputers with massive computational capabilities.

In general, a significant amount of the work in this field is conducted by computer engineers.

Computer engineers labor tirelessly to develop new software and computer-related hardware to be used in a variety of applications including information & communication technology.

Computer engineers apply computer science methods to analyze and solve computer-oriented problems.

As the desire for advanced computer and information technology continues to increase, so too does the demand for these professionals. The Bureau of Labor Statistics (BLS Oct. 2017) reported that openings in computer hardware engineering were expected to swell five percent globally between 2016 and 2026, roughly on par with the average growth anticipated across all occupations during that time period. The BLS also found that job opportunities for software developers and IT - a position held by some computer engineers—were expected to grow by 24 percent between 2016 and 2026, adding an incredible number of jobs across the country.

##### **7.1.1.2 Objectives of the Programmes**

Computer engineers are responsible for making day-to-day life easier while protecting the nation's infrastructure against cyber and physical attacks. These engineers improve quality of life by creating innovative systems such as smart houses, self-driving cars and medical instruments. Computer engineering and IT principles can be applied to a number of other purposes, including the development of integrated circuits, embedded systems, computer vision, computer systems architecture, and much more. Generally, in order to pursue work as a

computer & IT engineer, prospective students must first complete a degree in this specific subject, either at the associate or bachelor's level. Not all computer engineering & IT programmes are identical, with each having certain unique characteristics.

That said, the objectives of this programme are as follows:

- (a) To study Computer Engineering and philosophical logic and philosophy of information technology at an advanced, research-led level.
- (b) To gain an understanding of how knowledge is created, advanced and renewed.
- (c) To equip students with the skills needed to contribute to this exciting and rapidly evolving field.
- (d) To prepares students to apply hardware and software techniques and problem solving to a variety of topics in computer engineering and IT;

To encourage and inspire all students to have a desire to pursue learning with curiosity, integrity, tolerance and intellectual rigour.

### **7.1.2 List of Academic Programmes**
