- (ii) Invigilators should be present in the examination room at least twenty minutes before the commencement of the examination.
- (iii) Invigilators will be provided with the following items by the
University Examinations Officer:
 - a) The question papers to be attempted by candidates. Note: Sealed envelopes containing question papers must be personally collected by each invigilator from the said Examinations Officer at least twenty minutes before the examination. All invigilators who have reported to the Examinations Officer within this period should immediately proceed to their respective examination room.
 - b) A list showing the names of the papers to be attempted in the room

UAUT PROSPECTUS FOR 2022/2023 ACADEMIC YEAR

(This will be distributed to invigilators in advance).

- (iv) Invigilators must ensure that ONLY ONE answer book is provided for each candidate unless the rubric on the question paper requires otherwise. The answer book must be filled before any additional paper is provided.
- (v) Question papers and any other material prescribed in the rubric (e.g. log-tables, charts etc.) should be set out by the invigilator with the help of the Internal Examiner.
- (vi) Candidates must write their registration numbers and degree programmes on the cover page of the answer book before they start to write the examination.
- (vii) Food, drinks (except where water is permitted-see below), cigarettes, laptops, recording or playback devices, and other electronic communication devices such as a cell or smart phones, bags, purses, hats, books attached cases, papers and other related items are not permitted in the examination room. The University assumes no responsibility for personal property lost in or near any examination room.
- (viii) Students with approved health conditions may bring (transparent) bottled water into the examination room. Such students will have to be seated away from other students to avoid accidental spillage.
- (ix) Invigilators* should admit candidates to the examination room ten minutes before the commencement of the examination and they should ensure that they take the right places. Where big numbers of candidates are involved, invigilators may admit candidates to the examination room fifteen minutes in advance.

*Invigilators are requested to stick to this arrangement. During these ten minutes the invigilator should:

- a) Make an announcement to the effect that unauthorized materials are not allowed in the examination room;
 - b) Make an announcement to the effect that candidates should satisfy themselves that they are in possession of the correct paper;
 - c) Call attention to any rubric at the head of the paper which seems to require attention;
 - d) Announce that, where this is practicable, both sides of the paper must be used. He/she should then tell students when they may begin writing. Candidates will normally be allowed a maximum of ten minutes to read the paper.
- (x) It is mandatory for all students sitting examinations to be in possession of a valid Student ID card, which is to be placed on the top right-hand corner

UAUT PROSPECTUS FOR 2022/2023 ACADEMIC YEAR

of the desk throughout the examination for Invigilators to check. Students without their ID card shall not be permitted entry to the examination room, and shall be directed to the ID Office to obtain a valid ID card.

- (xi) Invigilators should not admit candidates to the examination room after half an hour from the commencement of the examination and should not permit them to leave the room until thirty minutes have expired.

B: DURING THE EXAMINATION

- (i) At the commencement of the examination, invigilators should remind candidates to ensure that they are attempting the right examination paper.
- (ii) At the end of the first half hour the total numbers present should be noted down.
- (iii) Invigilators should then collect the blank answer-books from all vacant places. Spare question papers should be returned to the correct envelopes for collection by the Internal Examiner. It is at this time that candidates should start to sign the examination attendance sheet. During the exercise, invigilators should also make sure that the photo on the candidate's ID card matches the candidate's face and that the registration number on the ID card is the same as the one written on the answer book.
- (iv) Invigilators should minimize announcements during the examination.
- (v) An invigilator shall not allow candidates to borrow or exchange items such as rulers, pens, pencils and calculators during the examination.
- (vi) During the examination, invigilators should ensure that candidates are provided with any additional requirements (e.g. scripts, blotting-paper, log-tables etc.). All rough work must be done in the Answer Book and crossed through.
- (vii) No candidate should be permitted to leave his/her place during the examination except to leave the examination room.
- (viii) A candidate may, with the permission of the Invigilator, leave the examination room briefly only if accompanied by an assigned assistant Invigilator. Candidates will not be readmitted to the examination room after they have left the examination room unless, during the full period of their absence, they have been under approved supervision.
- (ix) Permission to leave the examination room shall be granted in exceptional circumstances as invigilators are expected to remind candidates to go for short calls before they enter the examination room.
- (x) A candidate who contravenes the regulations and instructions governing the examinations, especially by unfair practices such as copying from or

communicating with other candidates shall be reported immediately to the Examinations Officer.

- (xi) Once a student is found with unauthorized materials, the invigilator should ask the student to sign on the materials to confirm that they are his/hers. PROVIDED that where a candidate/student refuses to sign on the material, the examination officer shall request another invigilator to witness and countersign stating the candidate has refused to sign the material.
- (xii) The candidate shall be informed that he/she has contravened the regulations and that he/she has been reported, but shall not be prevented from continuing with his/her paper. A written report must be sent to the Examinations Officer, including full details of the contravention. The Examinations Officer shall then forward the matter to DVC (ARC). It is part of the invigilator's duty to move about the examination room as quietly as possible at frequent intervals.
- (xiii) Invigilators shall have the power to confiscate any unauthorized book, manuscript or other aid brought into the examination room and to expel from the examination room any candidate who creates a disturbance. They shall report to the Examinations Officer any case of a candidate suspected of giving or obtaining unauthorized assistance or of attempting to do so, and that officer shall have power to take any further steps he/she may consider necessary. He/she shall then report the matter to the DVC in charge of academics.
- (xiv) Cases of illness during examination should be reported to the Examinations Officers as soon as possible for assistance.

C: AT THE END OF THE EXAMINATION

- (i) Invigilators shall not permit candidates to leave their places before their scripts have been collected. Candidates who wish to leave the examination room before the end of the examination shall hand over their scripts to the invigilator before leaving the examination room. At ten minutes before the conclusion of the examination period, the Invigilator shall announce the time remaining. Candidates may not leave their seats in the examination room after this time (except in case of emergency) until all papers have been collected. At the end of the examination period invigilators shall instruct the candidates to stop writing and then collect all the scripts.
- (ii) Invigilators shall enter the number of examination scripts collected from the candidates on the attendance sheet provided by the Examination Officer at the time of collecting the examination papers. Invigilators shall sign the said attendance sheet before they hand over all the scripts to the Examinations Officer at the end of the examination. On receipt of the scripts, Examinations Officer will check them and let the Invigilators countersign on

9 CAMPUS COLLEGES

9.1 COLLEGE OF ENGINEERING AND TECHNOLOGY (CoET)

9.1.1 Introduction

The College of Engineering and Technology (CoET) was founded in 2012. It comprises one department namely; Computer Engineering and Information Technology (CoEIT), and offers the Bachelor Degree in Computer Engineering and Information Technology programme.

UAUT PROSPECTUS FOR 2022/2023 ACADEMIC YEAR

9.1.2 Justification of the Programmes offered at CoET

The modern era has witnessed a rapid development in computer technology, both in hardware and software. Each year a host of new advancements is unveiled, from home robotics to advanced operating systems, microprocessors, and supercomputers with massive computational capabilities.

In general, a significant amount of the work in this field is conducted by computer engineers.

Computer engineers labor tirelessly to develop new software and computer-related hardware to be used in a variety of applications including information & communication technology. Computer engineers apply computer science methods to analyze and solve computer-oriented problems.

As the desire for advanced computer and information technology continues to increase, so too does the demand for these professionals. The Bureau of Labor Statistics (BLS Oct. 2017) reported that openings in computer hardware engineering were expected to swell five percent globally between 2016 and 2026, roughly on par with the average growth anticipated across all occupations during that time period. The BLS also found that job opportunities for software developers and IT - a position held by some computer engineers—were expected to grow by 24 percent between 2016 and 2026, adding an incredible number of jobs across the country.

9.1.3 Objectives of the Programmes

Computer engineers are responsible for making day-to-day life easier while protecting the nation's infrastructure against cyber and physical attacks. These engineers improve quality of life by creating innovative systems such as smart houses, self-driving cars and medical instruments. Computer engineering and IT principles can be applied to a number of other purposes, including the development of integrated circuits, embedded systems, computer vision, computer systems architecture, and much more. Generally, in order to pursue work as a computer & IT engineer, prospective students must first complete a degree in this specific subject, either at the associate or bachelor's level. Not all computer engineering & IT programmes are identical, with each having certain unique characteristics. That said, the objectives of this programme are as follows:

- a) To study Computer Engineering and philosophical logic and philosophy of information technology at an advanced, research-led level.
- b) To gain an understanding of how knowledge is created, advanced and renewed.
- c) To equip students with the skills needed to contribute to this exciting and rapidly evolving field.
- d) To prepares students to apply hardware and software techniques and problem solving to a variety of topics in computer engineering and IT;

UAUT PROSPECTUS FOR 2022/2023 ACADEMIC YEAR

- e) To encourage and inspire all students to have a desire to pursue learning with curiosity, integrity, tolerance and intellectual rigour.

9.1.4 List of Academic Programmes

9.1.6 Department of Computer Engineering and Information Technology

9.1.6.1 Courses Offered by the Department

The department of CoET has common courses in the department for the First and Second Years of study. Allocation of students to departments is done at the time of admission on the basis of their applications to join the University and entry qualifications.

For their third- and fourth-Year courses, students are given the opportunity to choose between additional subjects (electives) offered by the departments of the CoET, or by any other Institutes of the University if these subjects are approved by the respective CoET Boards and fit in the timetable. The course comprises both theoretical education and practical instruction in the CoET workshops, laboratories and industry.

After completing the second semester of the first year of study; First, Second and Third-year students are required to undergo practical training (PT1, PT2, PT3) in the field. PT will not have a university examination. Students will be assessed at the field station by Internal and External Examiners. Students will be required to submit PT reports after the PT sessions which will be marked by Internal Examiners. The assessment of the PT reports will contribute to the final GPA. Each PT will have a weight of 8 Credits which are to be counted in the following year of study.

9.1.6.2 Explanatory Notes on the Coding of Courses

The course code consists of five characters. The first two identify the academic unit that hosts the course. The third digit identifies the level of the course, the fourth identifies the specific section of the academic unit offering the course and the fifth identifies the different courses within the academic unit. Examples of code of academic units are as follows:

BA	:- Business Administration
CL	:- Communication Skills
